Chapter 1 Introduction	1
1.1 The Goal of Finance: Relative Valuation	1
1.2 Investments, Projects, and Firms	3
1.3 Firms versus Individuals	5
Part I Value and Capital Budgeting	9
Chapter 2 Present Value	11
2.1 The Basic Scenario	11
2.2 Loans and Bonds	12
2.3 Returns, Net Returns, and Rates of Return	13
2.4 Time Value, Future Value, and Compounding	16
2.5 Present Value, Discounting, and Capital Budgeting	22
2.6 Net Present Value	26
Summary	31
Chapter 3 Stock and Bond Valuation: Annuities and Perpetuities	37
3.1 Perpetuities	37
3.2 Annuities	44
3.3 The Four Formulas Summarized	48
Summary	50
Chapter 4 A First Encounter with Capital-Budgeting Rules	55
4.1 Net Present Value	55
4.2 The Internal Rate of Return (IRR)	59
4.3 The Profitability Index	67
4.4 The Payback Capital-Budgeting Rule	68
4.5 How Do Executives Decide?	69
Summary	70

Chapter 5	Time-Varying Rates of Return and the Yield Curve	75
5.1	Working with Time-Varying Rates of Return	76
5.2	Inflation	82
5.3	U.S. Treasuries and the Yield Curve	86
5.4	Why Does the Yield Curve Usually Slope Up?	95
5.5	Corporate Time-Varying Costs of Capital	99
	Summary	100
Chapter 6	Uncertainty, Default, and Risk	105
6.1	An Introduction to Statistics	105
6.2	Interest Rates and Credit Risk (Default Risk)	110
6.3	Uncertainty in Capital Budgeting	121
6.4	Splitting Uncertain Project Payoffs into Debt and Equity	123
	Summary	131
Part II	Risk and Return	137
Chapter 7	A First Look at Investments	139
7.1	Stocks, Bonds, and Cash, 1990-2016	139
7.2	Overview of Equity-Related Market Institutions	156
	Summary	163
Chapter 8	Investor Choice: Risk and Reward	167
8.1	Measuring Risk and Reward	167
8.2	Diversification	171
8.3	Investor Preferences and Risk Measures	175
8.4	Interpreting Some Typical Stock Market Betas	185
8.5	Market Betas for Portfolios and Conglomerate Firms	187
	Summary	189
Chapter 9	Benchmarked Costs of Capital	197
9.1	What You Already Know	197
9.2	The Risk-Free Rate — Time Compensation	198
9.3	The Equity Premium — Risk Compensation	199
9.4	Forward-Looking Benchmarks	208
9.5	Asset Costs of Capital vs. Equity Costs of Capital	212
9.6	Deconstructing Quoted Rates of Return	212
9.7	Other Benchmarks and “The Method”	214
	Summary	214
Chapter 10	The Capital Asset Pricing Model	217
10.1	What You Already Know	217
10.2	The Capital Asset Pricing Model (CAPM)	218
10.3	Estimating the Extra Input: Market Beta	225
10.4	Neutralizing Equity-Premium Uncertainty?!	228
10.5	Is the CAPM the Right Model?	228
10.6	Good CAPM Alternatives and Perspectives	235
	Summary	238

Part III Market Efficiency	245
Chapter 11 Market Imperfections	247
11.1 Causes and Consequences of Imperfect Markets	247
11.2 Opinions, Disagreements, and Insider Information	253
11.3 Market Depth and Transaction Costs	256
11.4 Taxes	263
11.5 Entrepreneurial Finance	269
11.6 Deconstructing Quoted Rates of Return—Imperfect Market Premiums	270
11.7 Multiple Effects: How to Work Novel Problems	274
Summary	276
Chapter 12 Perfect and Efficient Markets, and Classical and Behavioral Finance	283
12.1 Market Efficiency	283
12.2 Market Efficiency Beliefs and Behavioral Finance	289
12.3 The Random Walk and the Signal-to-Noise Ratio	292
12.4 True Arbitrage and Risk(y) Arbitrage	297
12.5 Investment Consequences	300
12.6 A Cynical Perspective	307
12.7 Corporate Consequences	309
12.8 Event Studies	313
Summary	315
Part IV Real-World Applications	321
Chapter 13 Capital Budgeting Applications and Pitfalls	323
13.1 So Many Returns: The Internal Rate of Return, the Cost of Capital, the Expected Rate of Return, and the Hurdle Rate	323
13.2 Promised, Expected, Typical, or Most Likely?	324
13.3 Badly Blended Costs of Capital	326
13.4 The Economics of Project Interactions	331
13.5 Evaluating Projects Incrementally	336
13.6 Real Options	342
13.7 Behavioral Biases	347
13.8 Incentive Issues	348
13.9 An NPV Checklist	354
Summary	356
Chapter 14 From Financial Statements to Economic Cash Flows	363
14.1 Financial Statements	363
14.2 Long-Term Accruals (Depreciation)	371
14.3 Deferred Taxes	379
14.4 Short-Term Accruals and Working Capital	382
14.5 Earnings Management	385

14.6	Economic Cash Flows from Intel's Financials	386
14.7	What To Believe on the Balance Sheet	388
	Summary	389
Chapter 15 Valuation from Comparables and Financial Ratios		395
15.1	Got Your Marbles?	395
15.2	Comparables and Net Present Value	396
15.3	The Price-Earnings (P/E) Ratio	400
15.4	Problems with Price-Earnings Ratios	404
15.5	The Empirical Evidence in 2016	411
15.6	Other Financial Ratios	416
	Summary	426
Part V Capital Structure and Payout Policy		431
Chapter 16 Corporate Claims		433
16.1	The Basic Building Blocks	433
16.2	Liabilities	436
16.3	Equity (Stock)	443
16.4	Understanding Intel's Capital Structure in 2015	444
	Summary	451
Chapter 17 Capital Structure in a Perfect Market		455
17.1	Maximization of Equity Value or Firm Value?	455
17.2	Modigliani and Miller	458
17.3	The Weighted Average Cost of Capital (WACC)	464
17.4	State Prices and Credit Derivatives	474
17.5	Cost of Capital Nuances and Non-Financial Liabilities	475
	Summary	479
Chapter 18 Taxes and Capital Structure		485
18.1	Relative Taxation of Debt and Equity	485
18.2	Firm Value Under Different Capital Structures	487
18.3	Formulaic Valuation Methods: APV and WACC	489
18.4	Sample Applications of Tax-Adjusted Valuation	497
18.5	Contemplating Corporate Taxes and Leverage	503
18.6	Personal Income Taxes and Clientele Effects	506
18.7	The U.S. Tax System (Mess)	514
	Summary	517
Chapter 19 More Imperfect-Market Capital Structure		525
19.1	What Really Matters?	525
19.2	Operating Policy in Bad Times (Distress)	526
19.3	Operating Policy in Good Times (Agency)	536

19.4	Bondholder Expropriation	539
19.5	Private Information and Adverse Selection	545
19.6	Other Important Concerns	549
19.7	Static Capital Structure Summary	551
19.8	The Effect of Leverage on the Cost of Capital and Value	551
19.9	Valuation Formulas with Many Market Imperfections	554
19.10	Capital Structure Dynamics	558
	Summary	559
Chapter 20	Equity Payouts: Dividends and Share Repurchases	565
20.1	Background	565
20.2	Perfect-Market Irrelevance	568
20.3	Dividends and Share Repurchases	570
20.4	Empirical Evidence	575
20.5	Survey Evidence	585
	Summary	586
Part VI	Projecting the Future	591
Chapter 21	Pro Forma Financial Statements and An Intel Case	593
21.1	The Goal and Logic	593
21.2	The Template	595
21.3	The Length of the Detailed Projection Period	595
21.4	The Detailed Projection Phase	598
21.5	The Terminal Value (TV) Multiplier	607
21.6	Basic Intel Pro Formas	610
21.7	Sensitivity and Scenario Analyses	613
21.8	Caution—The Emperor's New Clothes	615
	Summary	616
	Back Matter	619
	Epilogue	621
	Theory or Practice?	621
	Thoughts on Business and Finance Education	623
	Finance, Economic, and Data Degree Programs	627
	Bon Voyage	628
	Appendix Chapter. Technical Background	631
	General Mathematical and Statistical Background	631
	Laws of Probability, Portfolios, and Expectations	634
	Cumulative Normal Distribution Table	638
